

IMPORTANT - READ CAREFULLY

HOW TO USE AND CARE FOR YOUR NEW CANVAS PRINT

Wow! Your new Canvas print is going to look great on your wall

- Your canvas print has been printed with waterproof, solvent-based inks that are UV resistant with a 3-year warranty for outdoors.
- Unlike photos, with proper care you should expect to enjoy your canvas print for 20 years or more.
- If framed, your canvas print has been corner braced for added stability. Removing the canvas from the frame may damage the canvas so we do not recommend it.

DISPLAY

- Thoughtful placement of your print can dramatically impact the lifetime of your canvas print.
- Never hang prints in direct sunlight especially avoiding southern exposures, as the colours may completely fade out. Like all artwork, do not display your canvas print in direct sunlight.
- Avoid displaying canvas prints near air purifiers, heating and cooling ducts, TVs, CRT monitors and photocopy machines.
- Over fireplace display is not recommended as heat and smoke may damage the print
- We recommend displaying canvas prints away from high humidity environments such as kitchens and bathrooms, as the humidity may cause mold or fungi growth on the canvas.
- The inks are warranted for outdoors but the canvas substrate is not, so we do not recommend that canvas prints be displayed outdoors. Lamps should not be placed in close proximity to art prints. ie. A 40-watt bulb should be over 18 inches away from a print as the bright light and heat can damage your print.

CARE & CLEANING

- Your canvas print is durable but due to the rough canvas finish it is not laminated so it is susceptible to scratching, so be careful when transporting and storing.
- We recommend cleaning your canvas with plain water or warm water and mild detergent on a damp soft cloth.
- Do NOT use solvent-based cleaners (such as fantastic) on canvas prints as this may remove or degrade the ink.
