SHORT RUN PRINT READY DOCUMENTS

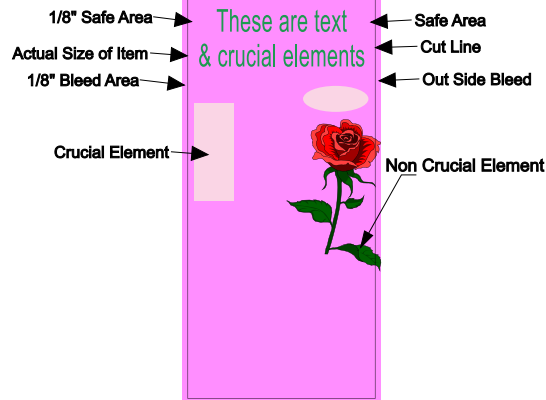

In order to provide you with the best printing prices we require that your document be set up in order to allow quick and efficient printing.

- We require your file in pdf form.
- Do not include crop lines.
- If printing 8.5"x 11" without bleed (white on all 4 edges) items the best set up for the lowest price is 2 pieces onto an 11"x17". This requires that your 2 no bleed pages are 8.25" x 10.75" and spaced .25" apart. The entire document including both pages to be cut apart are centered in the 11"x17" page.
- If bleed is required the document will have to be printed on larger paper and edges trimmed ie. 2 - 8.5"x11" final size onto 12"x18" rather than 11"x17" to allow for bleed.
- When setting up for bleed, allow for safe area and bleed area as below.

2 - WITHOUT BLEED 8.5"x11" ONTO A 11"x17" (FOR BEST PRICING)

Pre-print Item **BLEED**
 Text & crucial elements stay inside of the safe area. For printing that is not full bleed (all print objects do NOT go to outside edge) then every item stays inside the safe area. (Full Colour Full Bleed)

Have your file set up to take advantage of our best printing prices. If you require set up of your documents the layout/design rate is \$55/hr.
